

The JFK Assassination

<https://www.youtube.com/watch?v=QOLDjiOoau0> (<https://www.youtube.com/watch?v=QOLDjiOoau0>)

Uploaded by [The Future of Freedom Foundation](https://www.youtube.com/channel/UCqOG4zIDmbIUk12Fzwg5tLA)
(<https://www.youtube.com/channel/UCqOG4zIDmbIUk12Fzwg5tLA>) on Fri Jan 15 2021.

In this video presentation, FFF president Jacob Hornberger provides an synopsis of the JFK assassination in the context of other Cold War-era regime-change operations conducted by the U.S. national-security establishment. He also shows how the national-security establishment's fraudulent autopsy that was carried on the president's body leads directly to those who carried out the assassination.

FFF would like to thank Dory Wiley and Commerce Street Capital for hosting this talk.

[Music] all right hello everyone uh welcome to our fourth day of virtual luncheon series on the jfk assassination uh first time to do it virtually this year because of covet virus it's going very well many of you have been here all week many of you have seen uh several presentations uh and some of you are just coming in for the first time today so uh really appreciate it as a quick recap on monday we did the basics of the assassination with uh uh also covering various conspiracy theories uh then on tuesday uh was really interesting we had a doctor cyril wecht who's 89 years old and sharp is attacked and has been doing jfk assassination research and testimony uh for you know as long as the warren commission's kind of been around so that was terrific i hope you really enjoyed that uh that was not only nice for people to learn something but also see a piece of history on wednesday we really packed it in with a long day we had chris fulton with his uh story about the inheritance and what he calls the poison fruit of the kennedy assassination and how it affected him uh for many of you that's uh first time you've heard that it's a book's only been out a few years we're working on a possible movie with chris uh it's a pretty tough uh thing to swallow and appreciate what went on and then uh we also had dick russell yesterday uh talking about richard k snaggle the man who came into an el paso uh bank shot his pistol up in the air uh he was supposed to kill oswald he didn't and he wanted to be in jail so he uh didn't get himself into

[00:02:01 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=121s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=121s)

uh didn't get himself into an issue um dick russell also talked about many other things that he did and i learned i learned a little bit more about dick here's today dick's been an investigative reporter uh freelance on worked on the jfk assassination on and off for the last 50 years as well today we have a nice treat uh i'm going to go through something really really quick that i want to show you and then we're going to start on with jacob hornberger but i want to go through something uh as fast as i can here short presentation on remember i talked to you on monday and on monday i said uh um you know there are some things that all you gotta do is just prove there there's another bullet or another shooter and it blows a warrant commission kind of uh uh right out and we talked about our money so i'm just gonna show there's there's at least 15 or so things that you can focus on that do that so one of the things i wanted to focus on today just to give you an idea this is a quote by the way from congressman hal boggs if you remember he's from louisiana was on the warren commission and died in a mysterious plane crash you know after he got very uh coincidentally uh suspicious about the warren commission uh this is a quote from him about hoover lying his eyes out to the commission on oswald ruby their friends are bullets or guns you name it uh pretty pretty uh compelling so remember we spent a lot of time with cyrus west and i spent some on monday talking about the magic bullet

right and how the warren commission had a problem with these three bullets and the first bullet missed the second bullet had to make it cause all the injuries because the third bullet hit jfk in the head so this was the path of the second bullet very important that you follow this today because what i'm going to show you

[00:04:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=240s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=240s)

today because what i'm going to show you and then what jacob shows you is very important in refuting kind of what happened uh at the warren commission because they based the whole thing on this first long assassin if this blows up then there's not a lone assassin then you by definition have multiple people involved and then you have a conspiracy to kill the president so just as a quick reminder that's that and again they say the first shot hit kennedy uh are missed actually and they hit james take and then the second shot you know went through his back out his throat into governor connelly and uh caused all the damage with him and the third shot would have blown his head up so uh let's talk a little bit about that we went through this uh on tuesday with dr weck so uh there's all kinds of testimonies of frontal gunshots that showed up but one thing i want to focus on i showed you this on monday there's all kinds of bullet evidence but focus on number one here on the overpass coming from the front or possibly two which i talked to you about tash plumley being a witness and a lot of work on ballistics by sherry feister coming over here on the right this will be shot number two that will come from the front okay so one of these two places created this this is the evidence i want to show you today this is the windshield and that should look like a bullet hole to you now there's also this shot which is a shot into the front dash but i'm just focusing on the windshield today and here you might go well i can't see anything in the windshield but yes you can see this uh um antenna on the back back when we used to have antennas on cars and you see that windshield right there see that hole see that white spot let me blow it up you see it now see that so here it is in the window president kenny's already been shot

[00:06:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=360s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=360s)

president kenny's already been shot secret serviceman clint hales already jumped on the back and then uh here is the the uh limousine at parkland hospital you know wow well maybe we can blow that up so let's see if we can yep we sure can and look what we have here there's the hole again and there it is again blown up so we also have eyewitnesses that testify uh avelia glanges a medical student talks about hey the hole was very clear through and through bullet hole i saw it through the windshield of the carbon front to back no there's no way any cracks associated with that bullet hole it seemed very high velocity bullet which by the way remember a man liquor kirkano cannot fire a high velocity bullet now why would she say that uh she actually was a gun expert and she shot guns all the way until she uh was an old lady she loved to go to the shooting shooting range and gun range and shoot guns uh george whitaker at the ford motor company when the limousine was brought back to be repaired he wrote this down and he kept a little diary on this because he thought it was highly suspicious that they not only had to fix up the limousine and replace the glass because it was uh it was all evidence and so he kept a little uh notebook and diary on that uh much to his danger and and it was all revealed much later uh other evidence from a dallas motorcycle patrolman about a hole in a front lip windshield as well as from h.r freeman i was right beside it i could have tested it was a bullet hole all kinds of evidence here secret service as well st louis dispatch reporters uh and this is where algorithms was when he took that photograph that i showed you uh from uh the front or which i'm about to show you which is this one okay remember this photograph so the first shot's already been done here is kennedy here here's his arms have already come up

[00:08:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=480s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=480s)

already come up and remember dr reck talking about governor connelly turning around this is jackie's white glove so all right so see this instant now see this little white spot here this is what we think is a bullet hole and caused probably the gunshot wound to the throat because his head has not exploded here so it'd have to be a different bullet so when you look here you match this up to the zapruder film this is the same instant in time here's kennedy's arms up here's her white glove holding his arm here's governor colin lee connolly turned around i'm going to go back see that governor connelly president or white glove this is the same

instant in time and it's really neat uh i guess in some ways uh to see this same instant in time and what's going on so let's blow that up a little bit here's the white it looks like a little hurricane spot where a bullet went through and here is the negative of it and so see jackie's white glove is now black everything's different and i thought that was just a neat way to look at it because now here's the black spot on the windshield where that happened let me blow it up here is jackie's white glove here is the little black hurricane dot through the windshield by the uh rear view mirror and then also here are news articles uh southeast missouri moon lewis and morning tribune on december 3rd december 4th both talking about the limousine and how there was a hole in the windshield and as well as here's one in the uh press from december 3rd uh limousine hole in the windshield so i just kind of wanted to show you that to you it's just one little thing that you can do in research all kinds of examples of how to go because once we prove there's a frontal wind shot uh windshield shot then the whole warren commission thing blows up and we've got a problem we got to throw it out and we

[00:10:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=600s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=600s)

a problem we got to throw it out and we got to start over now having said that now grant hopefully you've made jacob a panelist on here because i don't see him on here yet please admit him um and i'd like to introduce him jacob is the founder and president of the future of freedom foundation a libertarian educational foundation based in fairfax virginia he received his ba in economics from virginia military institute and his law degree from the university of texas he was a trial attorney for 12 years in texas he also was an adjunct professor at the university of dallas where he taught law and economics in 1987 mr hornberger left the practice of law to become director of the programs at the foundation for economic education in new york he founded fff in 1989 his books on the jfk assassination are the kennedy autopsy the kennedy autopsy 2 regime change the jfk assassination and the evil of the national security state he's done tremendous work uh uh capitalizing on some of the work with uh done during from the a r r b and the findings there but he put it together in a real sim he's an excellent communicator and i've met him before uh through dennis mcquestion a friend of the firm and uh i'm just honored to have you here today jacob uh i hope grant has added you as a panelist because i'm not sure i still see you yet uh but if you yeah there you are okay so you can go ahead and unmute put your video on and we're ready for you to start and i think you can screen share whenever you're ready okay uh well thank you dory it's an honor and a pleasure to be with you and good to see you again it's been a couple of years and it's nice to be here with your viewers and thank you for allowing me to share some perspectives on this horrific event in november of 1963. as you all know there's a lot of different theories as to who killed

[00:12:01 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=721s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=721s)

different theories as to who killed kennedy there's the mafia did it the soviets did it the cubans did it the uh lee harvey oswald did it uh space aliens did it there's all kinds of theories but throughout all of this controversy there is one indisputable fact one incontrovertible fact that everyone agrees on and it is that incontrovertible fact that inexorably leads us to realize who orchestrated and carried out this assassination that fact is that the u.s military conducted the autopsy on the body of president kennedy nobody disputes that and everybody agrees with it and as we go through this talk you'll see that that leads us to understanding how and why this assassination was carried out now if we go back to the evening of november 22nd 1963 just a few hours after the assassination or let's even go back further than that let's go to parkland hospital right after the president's declared dead the dallas county medical examiner dr earl rose announces that he's going to conduct an autopsy on the president's body now what's an autopsy simply a medical examination of a body that um by a established physician a forensics pathologist to establish the cause of death in gunshot wounds there's studies as to the trajectory of the bullets how many bullets and so forth and the pathologists will come up with the conclusion this is what caused this person's death in courtroom scenes it's often referred to the autopsy as the best evidence of what happened well at the moment that dr earl rose announces that he's going to do this autopsy which he was required to do under texas law keep in mind that this was just a straight murder case

[00:14:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=840s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=840s)

straight murder case under texas law the the there was no federal offense involved here wasn't a federal offense to kill the president at that time so it was just a stray murder case and under texas state law the texas medical examiner has to conduct an autopsy in a murder case at that moment a team of secret service agents led by a man named roy kellerman who interestingly had been the passenger in the limousine in which the president had been traveling when he was shot announced in a very loud voice that his team of secret service agents were not going to permit this autopsy to be conducted and there was a bunch of screaming yelling a rose said stood in front of the casket that had been brought over a beautiful expensive ornate casket and said you're not leaving this hospital until i conduct this autopsy and the team of secret service agents said we're operating under orders get out of our way there was profanity screaming it was a huge brouhaha hospital personnel said that they were scared to death they didn't know what was going to happen and because it was an impasse rose wasn't budging and at that moment kellerman and his team of secret service agents and let me show you a picture of kellerman and that's roy kellerman kellerman announces in a very loud voice well kellerman then pulls back as did the is the rest of his team their coat poc their po their coat jackets and jacob are you are you using a picture or presentation oh yeah i didn't click share the share screen yeah let me see where that is well it was there yesterday when we tested this i don't see it now though [Music] speaker recording okay we may have a problem yesterday there was a button here yeah they kind of move around depending on what computer you're using it should be on the same menu bar

[00:16:01 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=961s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=961s)

it should be on the same menu bar where you have the the mute and the start video there should be a share screen button somewhere okay all right now are you seeing oh share all right are you seeing kellerman now yes sir okay that's roy kellerman kellerman pulls back his coat jacket as as did the rest of the team and brandish guns so it was clear that they were prepared to use deadly force to get that body out of there and and prevent rose from conducting this autopsy and they succeeded in doing that at that point rose decided discretion was the better part of valor steps aside they take the the casket out to dallas love field where interestingly enough the new president lyndon johnson's waiting for it now it's not real clear as to who issued the order to kellerman but it's a virtual certainty that it had to be johnson because johnson was there at the hospital until the moment that president kennedy was declared dead then he gets in a car to head to love field and when he gets to love field he begins transferring all his luggage and other stuff from air force ii to air force one and removing seats in the back of air force one to make room for the casket but the virtual certainty he issued the order now when he was at parkland johnson alluded to the possibility that this assassination could be the first strike in a nuclear attack by the soviet union keep in mind that the cuban missile crisis had happened the year before the cold war was still at its height there was continuous tensions between the soviet union and the u.s so johnson was expressing this concern that hey they may be attacking us and this is a first step in that on his way to dallas left field he scrunches down in his seat and says you know we we could come under

[00:18:01 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=1081s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=1081s)

and says you know we we could come under ambush here by the soviets i i better i better scrunch down here and hide but interestingly enough when he gets to love field his actions belie any such concern because he takes the time to remove the seats in anticipation of the casket that he knows is coming and he takes the time to look for a federal judge to swear man even though bobby kennedy the attorney general had told him on the telephone you don't need to be sworn in you're automatically the president so johnson's actions were not of a president that was very concerned after all with the possibility that this could be the soviets because obviously if there existed even such a possibility johnson would have gotten up into the air immediately in order to direct america's defenses because if they're going to kill the president they're obviously going to target the vice president either with a shooting or with a nuclear missile fired into into dallas and so johnson takes the time to have this body delivered and of course the luggage transfer which he didn't have to do air force two was the exact replica of uh duplicate of air force one so in any event the body is delivered there and in this beautiful casket it's then flown to andrews air force base on air force one with johnson and there

the casket is taken off the plane and placed into a navy vessel with jack one kennedy and bobby kennedy in that vehicle and it slowly starts making its way out to the bethesda morgue where it's in that was about 6 p.m eastern time where at around 8 p.m it's finally the body is introduced in this in this dallas casket in an official way into the bethesda morgue for the the the autopsy now here's johnson getting sworn in by judge sarah hughes and uh now when

[00:20:01 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=1201s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=1201s)

now when when the body when well let's now jump to the mid-1970s the house select committee and assassinations has been convened people have heard about the warren report some of them have read it they understand it it it detailed that the ken that kennedy had been assassinated by a lone nut ex-marine with no apparent motive that had just discovered that he was going to be on the parade route because he worked at the texas school dick book depository and he said hey you know i can kill a president here and so he goes ahead and the official version is that he kills the president and it's just a straight simple murder case loan nun well people bought it at first but then as people started thinking about it they thought you know this doesn't make any sense there was too many anomalies too many contradictions and then people started raising all kinds of challenges and questions and contradictions so in response to this the house select committee on assassinations is convened in the 1970s mid-1970s and at the at the close of those proceedings a group of enlisted men came forward into the press and told a remarkable story they said that on the evening of the assassination they had carried in the president's body not in the big expensive ornate casket from dallas into which the body had been placed but in a cheap military-style shipping casket that the kind of shipping caskets that were used in the vietnam war for uh troops that were killed over there they said they they carried the body in at 6 35 pm which was almost an hour and a half before the official introduction of the body at 8 pm they said that they had been sworn to secrecy about this on the very right after the autopsy like on the monday or tuesday after the autopsy they said that they had been warned that

[00:22:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=1320s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=1320s)

they said that they had been warned that if they ever talked that they would be court-martialed and if they weren't in the military they would be criminally prosecuted in federal court they said they put the fear of god in this that this was a highly classified operation and they we essentially were going to take this secret to the grave with us well the house select committee starts releasing people from these vows of secrecy and that's when the story starts coming out now if we jump ahead to the assassination records review board in the 1990s we find verification of this now the assassination records review board if i can be permitted to digress a moment is the board that was brought into existence to mandate the official release of all jfk related records from the pentagon the cia the fbi the secret service and all federal agencies interestingly enough that even though the official report was that this assassination had been carried out by a lone nut assassin the entire investigation the whole episode had been shrouded from the very beginning in in national security which obviously made no sense you know what is a lone nut assassin that just happens to be working in a book depository have to do with national security and yet much of the warrant proceedings were were classified they were they were kept secret um they were held in secret a lot of the records uh were kept secret assassination related records so in 1991 oliver stone comes out with his movie jfk highly controversial stirs up the mainstream press they go on the attack because stone's thesis is is that this is a bunch of bull this is no lone nut assassin this is ridiculous that this was a national security state regime change operation that the national security state decided just that they had decided in other countries that where the prime minister or the president posed a threat to national security like in 1953 uh in in iran or 1954 in guatemala

[00:24:03 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=1443s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=1443s)

uh in in iran or 1954 in guatemala that that the president of the united states john kennedy because of what he was doing posed a much greater threat to national security than any foreign official that they had ousted and replaced with somebody more to their liking so at the end of that movie there's a little blurb that says they're still keeping their records secret the pentagon the cia the fbi the secret service and other federal

agencies because they say national security depends on this well this created such an outcry among the general public who had seen the movie that they started writing congress saying this is ridiculous release these records and at that time clinton was running against bush and clinton comes out and says i'm in favor of releasing the records and so bush george w bush george george h.w bush had been director of the cia was sort of put in an awkward position and he said okay well i'll sign such a law so they enact the jfk records act that mandates the release of all jfk related records interestingly enough somebody slips a provision into this law that says okay while you have to release your records the arrb which is the board that's going to enforce this thing is not going to be permitted to investigate anything they find and it was a mandate that was strictly enforced by the board of directors of the assassination record review board that if they told any staff member if you investigate anything you find you will be fired and so everybody would had to be very careful not to investigate anything but by the same token they came up with some very interesting revealing things that have been kept secret for 30 years many things that i think most americans don't realize that we're going to talk about today you're seeing before you the report from a sergeant marine sergeant named roger boyajian who had been kept secret by the military from the warren commission the house select committee and and hear the

00:26:01 (<https://www.youtube.com/watch?v=QOLDjiOoau0&t=1561s>)

house select committee and and hear the ar and from the arb the arb discovers his existence and he tells another remarkable story he says i was in charge of the marine team that carried this this cheap shipping casket contained the president's body in at 6 35 pm and you can see there at approximately 1700 hours 22 november a detail of 10 men was sent to the bethesda naval hospital the detail arrived approximately 1800 6 o'clock uh and then their number three at approximately 1835 which 6 35 the casket was received at the morgue entrance and taken inside well it turns out that boyajian had kept a copy of this report that this report had not been turned over by the military had never been disclosed by the military and he had kept a copy of it and he gave this to the arb and it was dated november 26th it was a copy of a contemporaneous report which verified that what those enlisted men have been saying in the 1970s was true now in the late 1970s there was a criminal case that uh a district attorney in in new orleans named jim garrison brought against a man named clay shaw alleging that shaw was part of this national security state regime change operation and in fact the movie jfk was modeled after the book that jim garrison wrote about about that particular trial and at that trial a colonel fink who was one of the three autopsy physicians testified and fink was asked uh what how did you get involved in this and he says oh well at 8 pm on the evening the assassination commander or admiral no commander james humes one of the other three autopsy physicians telephoned him and said hey we want you to come and help us out because humes was not a forensics pathologist he was just a pathologist

00:28:01 (<https://www.youtube.com/watch?v=QOLDjiOoau0&t=1681s>)

pathologist he was just a pathologist and but but fink was a forensic pathologist and humes testified that that humes told him at 8 pm we already have x-rays of the president's head now keep in mind that apm was the official introduction of the body in the dallas casket uh from the vehicle in which bobby kennedy and and mrs kennedy had been traveling so the question naturally arises how could they have x-rays of the president's head if that was the first time 8 p.m the same time that he was calling fink how could those x-rays exist so again a slip a slip up but verifying that the body had been brought in at 6 35 pm earlier and in fact one of the x-ray technicians later testified at the arrb that when he was carrying the x-rays up to the x-ray development room he saw mrs kennedy coming in uh which into the into the morgue which er the naval facility which obviously indicates that they already had the body in their possession earlier because the vehicle containing the dallas casket which obviously was empty at this point unbeknownst to mrs kennedy or bobby kennedy was still sitting out front of the bethesda naval hospital now what's going on here what what's happening why what are they doing in there for that hour and a half well to answer that question we need to go back to parkland hospital now immediately after the president was declared dead and the body been taken away two physicians two of the treating physicians at parkland held a press conference and they at that press

conference now keep in mind these are not pathologists they're treating physicians but they said that the the bully wound in the neck the the president suffered two wounds one to the head and one to the neck the one to the neck they said maybe probably was not fatal and they

[00:30:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=1800s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=1800s)

maybe probably was not fatal and they said that it was an entry wound right here in the front of the neck and you know they didn't they didn't do a dissection of the neck or anything like a pathologist would do but those of you that are familiar with parkland hospital know that this is one of the premier trauma hospitals in the country i mean if you're going to get shot by a gun parkland is a place to be taken to i mean this is what they specialize in and so they they could recognize the what an entry site of a bullet looks like and they said well from what they saw this was an entry wound they also testified well they all stated immediately after the the uh the president was declared dead and at this press conference all the treating physicians verified at that time that the president had a huge hole in the back of his head now like it was an orange sized hole okay no why is that important well because a big wound like that orange size denotes an exit wound because when a bullet enters the head from the front let's say it enters the size of a bullet but as it's proceeding through the head it's pushing brain mass in front of it so that when it reaches the out the other side of the skull it blows out into a big hole and so that's how you know it's an exit wound now let me let me one of the the treating physicians there was a a man named dr um mclelland uh i forget his first name but mclelland turned out to be one of the treating physicians at parkland he had a lustrous career he just passed away about a year ago and throughout his life he said that hole there that what happened was that he was brought to the front of the green when he got to the treating room uh the autopsy room the there were already some physicians there and they directed him to the head of the gurney where the president's head was and we're getting ready to do a tracheotomy and and

[00:32:02 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=1922s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=1922s)

tracheotomy and and mclelland was going to help with the tracheotomy but then he noticed the back of the president's head had this huge hole and he knew at that moment that this man was dead i mean he wasn't technically dead he was still alive but there is no way that somebody can survive a wound like that so any treatment was futile and he he called everybody over he says have you all seen this and well they had not seen it and they they raised up the back of the head and there's this huge wound in what's called the occipital region of the skull uh the lower right section they saw cerebellum leaking out which is the lower part of the brain and they knew that was it it was over now they went through the motions like they were you know do whatever they could to save but it was just rather than just standing around like they did the tracheotomy but it was just a matter of time now let me let me let me show you uh mclelland did lots of interviews that are online that you can check this is just one of them listen to what he says we can't hear him you can't hear that no sir i had the same problem the other day i was trying to play youtube on uh zoom and it didn't work okay well what he's saying there is that he was at the head of the gurney and he looked down at the back of the president's head what i just said and there's this huge massive hole in which he then summons the other treating physicians so now if we go to this website here is audrey bell she was one of the treating nurses she drew this for the arr b this is in the 1990s and that circle there denotes where she remembers that big orange size hole all right diana boron she draws the circle right there independently they weren't in the room at the same time she was helping get president kennedy out of the vehicle

[00:34:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=2040s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=2040s)

get president kennedy out of the vehicle when they brought him over to parkland uh kemp clark says it's in the occipital region of the skull that's the the rear of the skull lower rear here's dr kuriko he says there was a large quite a large defect about here pointing on the back of his skull dr charles crenshaw who wrote one maybe two book great books i highly recommend he said that there's his drawing of the the hole in the back of the head this is dr mclelland's drawing this is dr grossman's drawing this is dr mclelland again pointing to the back of his head the hole there in the back of his head uh this is dr paul peters right there occipital

parietal uh here's the um the guy that that the uh that was driving the ambulance that had the the uh the big dallas casket in it you could feel the sharp edges of the bone at the edge of the skull in the back of his head uh clint hill who was on the back of the limousine and pushed jacqueline kennedy back into the vehicle he was looking at this wound for the few minutes it took to get to parkland he later testified about that the the big wound in the back of the head here's some um uh drawings uh the one on the left is by the one of the morticians at uh in washington uh actually maryland that's tom robinson he has a circle there for the back of the head right here on the right is uh or in the middle is a drawing by an fbi agent james sibert showing where he remembers the hole was now what's the problem here well here's the problem this is the official autopsy photograph of the back of president kennedy's head now do you see any massive orange-sized wound there no there there's no big size wound there and because you see the orange size

[00:36:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=2160s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=2160s)

and because you see the orange size wound denoting or connoting an exit wound obviously doesn't fit with the official scenario because lee harvey oswald is in the rear and and so here you have a shot coming in from the front with a big massive orange size hole in the back well that doesn't fit the official scenario unless kennedy was turning around facing the school book depository which he never was so their claim the official claim is that kennedy got hit with the bullet from the rear and that little white spot there they said well that could have been it they never could decide where the hole was the supposed bullet entry one later they said it was there in the top of the head and they moved it down and then they moved it up further so they never really settled on where their so-called entry wound went but but you can see the problem here now okay now if we go back to 1990 in the 1990s the ar rb they discovered the existence of a woman named sandra spencer now spencer is november of 63 the petty officer in charge of the white house laboratory at the naval photographic center in washington she has a top secret security clearance she's in charge of the lab she works closely with kennedy with mrs kennedy both on classified photographs developing photographs informal photographs like the you know when they take pictures of their children and so forth in the family no one has ever questioned the credibility the veracity the professionalism of this woman first class navy personnel she is someone to testify before the arb and she tells another remarkable story she says on the weekend of the assassination she was asked to develop the autopsy photographs of president kennedy and on a top-secret classified basis she had kept a secret for 30 years more than 30 years i mean everybody in the military everybody in the government

[00:38:01 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=2281s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=2281s)

the military everybody in the government knows that when you have classified information you keep it secret even after you leave the military you you can't ever disclose it you take it to the grave with you for 30 years she had kept a secret as as a good military personnel would do well the arb releases her from her vow secrecy and she said that she developed these photographs and so they show her the official photographs in in the record including this one right there and she carefully examines it and she says no sir those are not the photographs that i developed on the weekend of the assassination the photographs i developed showed a big massive wound like an exit-sized wound in the back of the president's head which which confirmed what all the treating physicians had said at the time of the of the uh right after the president was declared dead and all the other witnesses along with the fact that they found a piece of the skull a medical student found a piece of a skull uh that on the in the grass the very next day and he took it to his uncle who happened to be a pathologist there at a hospital in in dallas and that pathologist took pictures of it and determined along with his team that this was from the occipital part of the brain of the of the skull which of course then confirmed the same thing that there was this massive exercise wound there were also people that got splattered by brain material in the back of the the limousine indicating that there had been a blowout in that direction so here you have sandra spencer saying essentially you've got two separate sets of photographs here one deceptive and one correct now how do how do they reconcile this you see now the arb couldn't investigate this they were prohibited remember somebody slipped a provision in the in the law all they could do is get documents released now somebody also slipped a provision in the

[00:40:01 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=2401s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=2401s)

somebody also slipped a provision in the law that said well you've got 25 years to do your releasing because the cia and the military and secret service were saying oh national security is at stake if we release these our records 25 30 years after the assassination which apparently ridiculous i mean what do they mean national security like what the the soviets are going to attack uh it's ridiculous the cold war was even over by that time you know the u.s is going to fall into the ocean it was ludicrous but somebody slipped the provision you got 25 years so while they got a lot of things released like sandra spencer's testimony they they still had 25 years which expired in the first year of donald trump's regime so trump said well yeah i'm going to go ahead and release him and the national archives was getting ready we're talking about like 15 000 records and uh the cia at the last moment told trump this is going to jeopardize national security if you release these things this is in you know 2016. and uh or 2017 and uh so trump goes along with them and extends the time for secrecy until october 2021 which of course means biden uh and uh there's the question no question the cia is going to ask for another extension and biden's going to grant it um so but it's incriminating the fact that they have to keep these records but you can understand why when you see all the things that have come out especially arb now you've heard a lot of controversy about the president's brain you know what happened to the brain what happened brian well it's actually irrelevant the real controversy of the brain which the mainstream press touched on but never really delved into remarkably so is the fact that there were two separate brain examinations now in in an autopsy usually just have one brain exam there's no no reason to have two and and the

[00:42:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=2520s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=2520s)

no reason to have two and and the autopsy physicians were saying that there was only one that's that's what they were that's what they told the warren commission the house select committee the arb but the arb's general counsel jeremy gunn and uh one of the his staff members douglas horn discovered that it wasn't true and the reason they the way they discovered this is that they had the testimony of two different groups of people some overlap of at the two different brain exams and so that's how they knew that there were two separate brain exams because one person was saying well i was there and another person was saying i was there and both of them confirmed that the other was not there and but there was overlap with respect to the autopsy physicians well at the first one the the brain was sectioned and this was verified by the official autopsy photographer now sectioned to means you cut it like a loaf of bread and after you do that you do that to look at trajectory of the bullet and you look at book bullet fragments and so forth and you remove fragments but uh your brain can't reconstitute itself well at the second brain exam which is depicted here in this drawing of the brain which that's that's a rendition of the brain that the supposed real brain um there's no section it's an intact brain now it's damaged but there's no sectioning here which obviously indicates that this is not the brain the president now keep in mind that bethesda is a teaching hospital they have plenty of specimens their brains hearts and kidneys and so forth wouldn't have been difficult to get a brain and produce whatever damage they needed but clearly this isn't the section of brain now what then is going on here well in order to understand what happens here because you've got now a fraudulent autopsy there is no way to reconcile a fraudulent autopsy

[00:44:01 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=2641s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=2641s)

fraudulent autopsy with a uh with an innocent explanation it's impossible that the autopsy then leads us to understand who conducted this assassination because these things don't get planned just at the last minute hey let's have a fraudulent brain let's have a fraudulent autopsy we're talking about the just a few hours after the assassination you know who's going to come up with that idea and say hey why don't we have a frozen autopsy here so clearly this thing takes planning and in fact colonel fink at the clay shaw trial said in response to the prosecutor's question why didn't you dissect the neck and and think hems and haws and hymns and haws and so the prosecutor says well okay that's all fine and good colonel fink but why didn't you dissect the neck and think hymns and haws and hymns and haws and finally the prosecutor turns to the judge and says your honor he's not answering the question would you please order him to answer the

question and he says colonel fink answer the question directly and fink was trapped and so fink says i uh i was ordered not to and he says well who who ordered you he said oh i don't remember but you see clearly what's happening here is that there's a deeper state force that's orchestrating events here and and guiding events directing the events because ordinarily at an autopsy it's the physicians who are in charge now why then would the national security state engage in in a cover-up why would more important why would they engage in this assassination that they then covered up with a fraud in an autopsy well this is goes back to the concept of regime change in the cold war where the national security establishment which had been brought into existence after world war ii the federal government was converted to a national security state giant military giant intelligence apparatus to fight the soviet

[00:46:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=2760s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=2760s)

apparatus to fight the soviet national security state well at this point the the military the cia believes that the communists are coming to get us there they're coming to get us from cuba they're coming to get us from the soviet union china that this is a life or death struggle and so you've got uh here's mohamed mossadek the prime minister of iran they oust in a regime change operation 1953 democratically elected there is um a cobo arbenz i don't know why that one's not popping up but he was the democratically elected president of guatemala they ousted him in a regime change operation they targeted him with assassination there was a fidel castro course that they repeatedly tried to assassinate because he was supposedly a threat to u.s national security there was salvador allende 10 years after the assassination which is very revealing he was the democratically elected president of chile and the the u.s national security establishment convinced the chilean national security establishment you have a duty to oust your president because he's a threat to national security these were all socialists they were um wanted to establish friendly relations with cuba the soviet union and therefore they were considered threats not just to let's say chile's national security they were considered threats to our national security well from the very beginning of the kennedy regime there was enormous animosity between kennedy and the u.s national security establishment you had um the bay of pigs where the the national security establishment had had planned this invasion of cuba under the eisenhower administration they thought that nixon would be elected president who had been vice president and instead kennedy was and they looked on kennedy as a neophyte a playboy a guy that didn't really know what he was doing so they set him up at the bay of pigs a lot of americans

[00:48:01 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=2881s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=2881s)

at the bay of pigs a lot of americans don't realize this that they told him we won't need air support here we can do this just with these cuban exiles and kennedy said well there's not going to be u.s air support and i said we don't need it anyway well it turns out as the records later revealed as they started coming out that the cia lied that they figured that they would trap kennedy and that once these exiles were being killed on the beaches at the bay of pigs that kennedy would have no choice but to send in the air support and even an invading force to save face well they didn't know john kennedy kennedy said in the midst of it they said well we need the air support after all and kennedy said no and so he let the thing go down and defeat there was like a thousand guys that were um taking cusp captive there were 100 or so killed and uh the the the the cia was livid i mean that this was a traitor he showed weakness in the eyes of the communist threat he didn't understand it and uh kennedy himself was livid because he knew he had been set up and so he fires alan dulles this is alan dulles he was the revered head of the c.i.a he fired his first assistant who was bissell as well as charles cabell um and so the war was on he puts bobby kennedy overseeing the cia he told he told us aides supposedly that he was going to tear the cia into a thousand pieces and scatter them to the winds at this point the military gets in involved and they start exhorting kennedy to invade cuba they have a program called operation northwoods they propose which was going to call for deceptive false flag attacks uh terrorist attacks on american soil that were going to kill real people and then blame it on the on the cubans which would give the excuse to invade cuba and kennedy to his everlasting credit rejected operation northwoods

[00:50:01 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=3001s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=3001s)

rejected operation northwoods this is uh uh general lemnitzer who was hated kennedy thought that he was a weak sister that didn't didn't show strength in the in the face of the communists wouldn't invade cuba uh this was general lemay again hated uh kennedy even after the assassination he was talking about how bad the kennedys were so this war was going on big time and kennedy by this time didn't trust the the military establishment or the cia establishment at all well then the cuban missile crisis hits and and i mean now they've they've got it over his head that if you had invaded when we told you to invade this wouldn't have happened we've got now nuclear missiles pointed at america here and so they were exhorting kennedy now's your time to invade now you've got the the good excuse to invade what they didn't know was that the nuclear missiles had already been armed they were battle they were uh tactical nuclear weapons the soviet commanders on the ground had been given battlefield authority by nikita khrushchev they didn't need his approval they could use them whenever they needed to and so if kennedy had followed what the cia and the military were exhorting him to do there is virtually no doubt that there would have been an all-out nuclear war because those soviet commanders would certainly have used those nuclear weapons and so kennedy ends up striking a deal over the vehement objections of the military in the midst of the crisis bobby kennedy tells his his soviet counterpart that he was negotiating with he says if you're going to strike a deal you better strike it now because my brother is in grave danger of a coup here and uh and that danger had been expressed by eisenhower on his farewell address when he talked about the dangers of the military-industrial complex kennedy understood what he was up against during his administration he had the novel seven days in may made into a movie great movie

[00:52:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=3120s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=3120s)

great movie highly recommended starring bert lancaster and and kirk douglas and ava gardner uh talking about the dangers of a military takeover in the u.s and kennedy had been instrumental in bringing that to a movie to serve as a warning so kennedy knew the force that he was taking on here but he strikes a deal with the soviets now the mainstream press and the historians have always said that that the soviets blinked they took their missiles out that's false it was kennedy who blinked and it was a good thing he did but he said look we won't invade cuba if you take your missiles out well that was the reason the missiles were put in the first place that's what castro wanted just don't invade me leave me alone and so the soviets remove their missiles kennedy doesn't invade he also agrees to remove nuclear missiles in turkey they were aimed at the soviet union and uh so that resolved the crisis but at that moment kennedy has this enormous breakthrough and he realizes how close the world had come to this nuclear holocaust and interestingly enough nikita khrushchev reaches the same breakthrough so they start negotiating a remarkable series of negotiations through personal letters that circumvented their respective new uh military establishments and intelligence establishments both of whom didn't trust them well kennedy throws the gauntlet down at the military intelligence establishment he goes and gives his commencement address at american university remarkable speech you can go watch it online you can read it here he doesn't consult with the cia or the military he just does this and he says the cold war is now over it's a racket we don't need it it's been a racket from the beginning we're going to live in peaceful coexistence with the soviets with the communist world later he he proposes a joint project to

[00:54:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=3240s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=3240s)

later he he proposes a joint project to the moon which means sharing rocket technology with them he enters into the nuclear test ban treaty over the vehement objections of the military which had considered his deal at the bay of pigs to be akin to treason and he says it's over we're we're now going to get along and in fact on the very day of his assassination he has an emissary having lunch with fidel castro to establish friendly relations with with cuba well now it's impossible to overstate the magnitude of what was happening here i mean this went far beyond what mosadek and iran did with what arbans did in in in guatemala what what allende would do in in chile what patrice lumumba was doing in the congo uh lumumba of course they they conspired to assassinate the cia did here was a u.s president that was saying the military intelligence establishment is wrong here this is not a big threat the cold war is a racket and i'm bringing it to an end and so you've got a huge difference in visions here there's a critical vision in the eyes of the military intelligence

establishment this is life or death this was a president who was effectively surrendering america to the soviets this was a life or death struggle here there was no negotiations with the soviets one of the one of the famous saiyans at during the cold war was you can always trust a communist to be a communist in other words you couldn't trust him at all and here was kennedy disarming nuclear test ban treaty no more nuclear testing in the environment now you're going to share rocket technology with the enemy he couldn't be impeached for it this was just a policy decision under our constitutional form of govern you remove a president through impeachment at this time or through election well the 64 election was around the corner but it was clear to anybody they could see that kennedy was going to defeat goldwater

[00:56:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=3360s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=3360s)

kennedy was going to defeat goldwater so if you were going to save america from this threat there was only one possibility it was the same avenue to save america that existed in 53 in iran guatemala 54 in cuba in the early 60s lumumba the congo in 61. uh 73 in in chile the only way is to oust that president uh and through assassination now here's the lee harvey oswald so here was the official story that oswald all this lone nut x-marine communists which never made any sense i mean how many marines do you know here's a guy that learns fluent russian and in the military how do you learn fluent russian as an enlisted man i mean you have to practice with a tutor you might be able to study books on the language but russian is a very difficult language he gets fluent uh well they have language schools in in the in the military he goes to the soviet union he supposedly defects us he's going to give up all the secrets and and he had been stationed at atsugi air base in japan where the top secret u2 spy plane was a cia spy plane and he says i'm going to disclose all my secrets so after a few years he he comes back to the united states he's essentially given the red carpet treatment the the strange group called traveler's aid funds his return back no questions asked he's not subpoenaed before a grand jury he's not brought before the cia he's not before before congress this is the height of the cold war this is the mccarthy hearings remember a few years before they went after hollywood directors dalton trumbo they were looking for communists in congress here is the america's most famous self-proclaimed communist lee harvey oswald and he's in a parallel universe they don't touch him they don't they don't do anything to him he comes back to dallas he goes to work for a photography firm that ironically develops top secret

[00:58:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=3480s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=3480s)

that ironically develops top secret photographs he goes to new orleans he gets a job with a right wing coffee owned coffee company you know what right winger's gonna hire a communist uh so the thesis here of those of us who who have no doubts that this was a regime change operation was oswald was a double agent you had double agents you recruit double agents out of the marines they they infiltrate him into the soviet union to to get information on living conditions there in the in the soviet union he comes back he's he's he keeps on with this facade that he's a communist because they're supposedly going to get him into cuba to assassinate castro at this point they've got the plots to assassinate castro they've the cia has partnered with the mafia and so they they set this guy up and here's what he said the whole time he says i'm innocent i'm a patsy i've been set up here uh and so they station him here and they they they they frame him and that's what a patsy is they frame him now the interesting question is and here's here's the ten thousand dollar question here if you're going to frame a guy and in fact this goes to the very brilliance of the assassination and keep in mind we're talking about some brilliant people here the cia is was was these are ivy league graduates they they were specialized in an assassination you can go online and see the assassination manual that they had as far back as 1952 where the just google assassination manual cia and you can read it they were talking about how to assassinate people never put it in writing how to keep it covered up that that this is a state-sponsored assassination and so these are brilliant people and they've specialized in assassination practically from the time the cia is brought into existence which is 1948 1947 48 so here they come up with a plot to frame a guy who's firing from the rear supposedly by with shots

[01:00:02 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=3602s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=3602s)

supposedly by with shots coming from the front does that make any sense i mean if you're going to frame a guy that's supposedly firing the rear wouldn't you want the shot all the shots coming from the rear why would you have them firing from the front and that goes to the very brilliance the cunning brilliance of this of this this assassination because you see what they did was they operated on two levels the one level was the world war three cover story where they got johnson gets warren to join the warren commission which he opposed because he was chief justice of the of the united states and he said it's a conflict of interest but he says we're looking at the possibility of world war iii here now why are they looking at the world war three possibility and johnson tells the same thing to senator russell who refused to serve because he hated warren well because there were shots fired from the front if there's shots fired from the front and there's a communist in the rear that means this is a communist directed assassination there's no other way around it you got an avowed communist here who are his confederates firing from the front has to be communist okay so that way you get warren to join this thing but more important you shut it down because what will that lead to it'll lead to nuclear war what other result could there be if the if the communists have have shot our president that's an act of war and so how do you go to now ordinarily you say why not go to war over this i mean they've shot our president well because it was the cia that had started the assassination game in the first place by trying to assassinate castro how do you go to war when you're the one that started this game a war that's going to wipe out mankind and so by developing this story that this is a communist conspiracy they're able to shut down the investigation immediately and and that's what they did they shut it down they said let's just

[01:02:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=3720s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=3720s)

it down they said let's just get the guy that did the shooting oswald and shut down everything let's go into this autopsy let's hide the fact that the shots were fired from the front let's alter the body or alter the photographs alter the x-rays and that way we can get this thing shut down and therefore nobody ever discovers who really carried out this assassination it's brilliant just absolutely brilliant and of course central to this is you gotta you gotta assassinate oswald because if oswald goes to trial obviously he's gonna say wait a minute this is who i really am and which of course blows everything up in fact my hunch is that the plan was to assassinate him at the school book depository and everything went awry which is why ruby had to later assassinate him so now where does this leave us you know well obviously all the people involved in this are dead is this just a matter of historical note well partly yes but it's an important part of our history it it i say it's time for americans to accept this part of our history this is our legacy as a national security state not just regime change operations in iran guatemala chile iraq afghanistan and a host of others congo but right here in the united states this is the monstrosity that came into existence after world war ii the national security state a monstrosity that in its own vision of patriotism and saving america and protecting so-called national security a stupid nebulous term that nobody's ever ever able to define we end up losing one of the most cherished presidents in our history who actually was the one that saved this country from from nuclear holocaust and so that's the ultimate lesson and this is what the work we do at the future of freedom foundation we're a libertarian organization we address all libertarian issues but we focus especially on the national security state way of life that we think this is the biggest mistake america ever made was converting the federal government from a limited

[01:04:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=3840s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=3840s)

federal government from a limited government republic to a national security state and that's the lesson here that eisenhower's warnings about the dangers of a national security establishment kennedy's warnings with seven days in may are just as valid today in fact they were the warnings of our founding fathers they stood against what they call standing armies which is just a word they use for national security establishments or military intelligence establishments because of the grave danger they pose to a democratic system and that danger exists to this day on that note i'll wrap it up and open it up for questions oh one more thing let me let me recommend some books before i forget uh number one book if if you haven't read jfk and the unspeakable why die and why it matters i can't recommend this book too highly and this is in fact this is the the book i always recommend to people that know nothing about this subject this doesn't go delve deeply into the autopsy but it'll give you this overall perspective of what happened here in terms of a regime change

operation um here is my book the kennedy autopsy it's our best seller uh ever at fff the future of freedom foundation i just got notified by amazon that they asked me for permission to have it considered for a special promotion that they're running of course i gave that this is the kennedy autopsy two it's a sequel uh you've got jfk's war with the national security establishment why kennedy was assassinated uh we just came out with a print version of that and uh that's by douglas horn who served on the assassination records review board and um this is my book regime change the jfk assassination that gives you the overall perspective of what happened here cia and jfk the secret assassination files by jefferson morley a former reporter for the washington post that's one of our books that kind of brings you up to date as to

[01:06:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=3960s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=3960s)

brings you up to date as to the secrecy of their files that they kept secret here is the real breakthrough book this is the watershed book this is douglas horn's book inside the assassination records review board my books the kennedy autopsy and the kennedy autopsy 2 are really reviews or synopsis of this book which is five volumes it's like coffee table size this is a tough read and you better be prepared for a tough read a lot of technical stuff in there but by the time you finish this five volume work you will have no doubts that this is not a conspiracy theory this is as much a fact as the regime change operations were in iran guatemala on both sides of the kennedy assassination chile lumumba and congo and so forth okay on that note um open it up for some questions great thank you jacob now one of the things i want to kind of ask you about a little bit is um the story of um john liggett and the swapping the bodies and things like that i'd like you to get into that a little bit and give your opinions and thoughts of that yeah great question you see obviously if the body is being brought in secretly at 6 35 pm in a cheap shipping casket somebody has removed it from the dallas shipping casket and then you have to put the body back in the dallas shipping casket to have it brought in officially at 8 p.m so it's a very sophisticated operation taking place here nobody really knows when the body was taken out from the time it left parkland hospital to the time it arrived at andrews air base all we know is that it was taken out for sure because of what the enlisted men said and all the things i cited earlier the most likely possibility was during the time of the luggage shift

[01:08:01 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=4081s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=4081s)

was during the time of the luggage shift because there was no reason for luggage to be shifted from air force two to air force one and johnson ordered that to be done like i said earlier the two planes were duplicates of each other they were both going back to the same place andrews air base so you could have left the luggage there but by bringing the luggage over and you've got the casket there it's very easy to quickly take the body out and put it into the shipping casket and then put it into the cargo hold that's the most likely possibility another possibility is while johnson was being sworn in because johnson insisted on everybody coming forward including mrs kennedy and there's a good possibility that that's when the shift took place now horn details what happened at the bethesda morgue to get the body back in to the dallas casket in his five volume book uh i've got that in my book as well i it's a it's a it's the final chapter about the kennedy autopsy called the kennedy casket conspiracy and uh in fact david lifton's book best evidence is which is another great book i highly recommend uh it was written in the 1970s and horn actually i think dedicates his book to lifton's book because lifton was the one that really uncovered the first one to start uncovering the idea of the body was brought in earlier and they go through this sophisticated operation after they had altered the body or created these fake false deceptive photographs and x-rays they go through a sophisticated operation to get the body back into the uh into the dallas casket they're at the morgue and rather than go into the details as to how that happened they enlisted the help of some fbi personnel there kellerman was involved in this there's very little doubt that kellerman was dirty in this whole thing kellerman was involved in the cask is shifting back into the dallas casket

[01:10:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=4200s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=4200s)

shifting back into the dallas casket at the bethesda morgue he was one of the he was in the passenger seat when it was when he was driving uh when kennedy was shot and then he was in charge of the the autopsy team that would not let the autopsy oh the the secret service team that would not let the autopsy be conducted there at parkland hospital yeah so as the story goes there's uh there's this mortician in the dallas area in arlington i believe named john liggett and uh he's called away and his f family is all on record on this uh in the movie the men who killed kennedy i believe the last episode which wasn't allowed to air for what 15 or 20 years but you can get it now on youtube john liggett did surgery on the president to make alter the wounds supposedly on air force one or somewhere and there were 30 witnesses that said even people in the autopsy movement said well looks like he's already been operated on and of course there was no operation done at parkland hospital and the strange story of john liggett is worth uh you know a present a presentation on its own but this there's also this theory that uh jd tippett whose nickname was um and one of our listeners brought this up as well uh nickname was jfk because they said he is all his friends and cohorts at the police department said he looked up like him was in a sense possibly even swap for the president for particularly the autopsy photos that didn't match up with the testimony of the parkland hospital uh doctors so uh any comments on uh uh all of that

[01:12:03 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=4323s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=4323s)

so uh any comments on uh uh all of that yeah i have to challenge the first part about liggett um that's that's just not true at all okay um they bring in they bring in the the dallas casket they but they they order it from a casket funeral home there in dallas they bring it over it's a beautiful very expensive casket they immediately take it to air force one there's no delay in that at all so there's there's no surgery at all being conducted on the way to parkland i mean on the way to love field and then there is no delay between the the um the casket arriving and and air force one taking off now that one could speculate that when the body is down in the cargo hold that there's some surgery taking place there obviously possible but horn details very carefully and like i say horn served on the assassination records review board there's very few people that know that this stuff backwards and forwards as well as horn that when when the when the body gets to andrews they it's already been shifted and there's a helicopter there and you can see the helicopter lights in the video and they they put the casket on the on that helicopter and that's the reason for getting it there and they drive it there in a black hearse this is what the enlisted men said that that men in suits were in this hearse uh with the casket the shipping casket and then the boyajian's team carries it inside that's the reason for the the body arriving early the hour and a half what they were doing was doing surgery there either to mask the the back of the head wound and then cover it up with scalp uh doing a very professional job to hide this and then of course the magic bullet theory not

[01:14:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=4440s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=4440s)

theory not looking not dissecting the neck and so forth they were doing everything they could humes boswell and and and fink that's where the surgery took place or the fake photography took place not real clear but that's the most logical place where the alterations were taking place that's the hour and a half and if you if you look at what they were at the testimony of what they were doing and so forth you see all kinds of anomalies another fascinating aspect to this is a guy named robert knudsen now newtson is the official white house photographer great guy he'd been the photographer for the white house for years and years many presidents i mean this guy was probably like in his 60s or 70s he served many presidents he on the weekend of this on the day of the assassination he is summoned to come and photograph the autopsy and and everything's top secret his family said he was away the whole weekend he comes back and he tells his family i can't talk about what i saw but he later tells them there were some real shenanigans going on but he says i i was the photographer for the autopsy and he later tells a photographer photography magazine national magazine in the i think it was in the 70s or so i was the official photographer and he he goes to to his grave telling his family there was some shady stuff going on here well everybody agrees that newton was not at the autopsy and yet if newton's telling the truth which clearly he was why would he lie this guy's a white

house photographer he was photographing something else that wasn't the kennedy autopsy but being led to believe that this was the autopsy so in other words there's a lot of shenanigans going on here but i think all the shenanigans take place

[01:16:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=4560s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=4560s)

i think all the shenanigans take place at bethesda and they did not take place beforehand and he was by mistake he died under mysterious circumstances and then those photos his home was ransacked and they stole the photos is that correct you remember that no i'm not familiar with that i'm pretty sure i think i bet a maybe not a steak dinner but a hamburger on it you may be thinking about another guy that supposedly videotaped it and he he had photographs in his possession where somebody had witnessed and i forget what that guy's name he was a navy guy and um he dies supposedly from a suicide and i think the gun was in the wrong hand i think he was left-handed and again was his right hand or something like that and they they never found his photographs that people had seen and or his videotape uh so i think that may have been what you were referring to well maybe i i know one of them i wanna i know one there was somebody that that had the original photographs and that had happened to and if i remember correctly this is a little bit shady i'll make it been a few years since i read it uh you know of course the theory you take one body and the in the shipping in one casket you know via helicopter to bethesda and then you slowly drive the other casket there and there i think there was some discussion about uh the trip in the in the car was very slow and a very succuluous route if i remember correct uh that may be i mean they were obviously just taking their time there were people along the route grieving of course and then when they get there they take their sweet time leaving the the car parked out in front for for obvious reasons i mean nobody can figure out why is it just parked there why is it just parked there well it was just parked there because the casket was empty they were having to alter the body or create these fake photographs and x-rays and then figure out how to get the body

[01:18:02 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=4682s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=4682s)

and then figure out how to get the body secretly back into the dallas casket so that everything looks on the up and up and so there's this famous chase scene where the the the uh the vehicle with the casket just takes off and they've got the color guard that's ready to carry the casket in it starts they don't know what's going on they start chasing it and this is the dead of night and so the the one with the casket finally loses them and they circle around to the more get the body into the casket and then go back to the front again where the color guard's saying hey where where'd you guys go and then it's the color guard that carries the body in at eight uh a lot of a lot of strange shenanigans going on but you see this nothing can be perfectly planned dory as you know any military operation there's gonna be flaws in it no matter how well you plan things are gonna go wrong it's too big a deal and it definitely went wrong you know i read something recently where someone had identified you know this commanding officer that told the dr fink not to dissect the throat and that it was actually general lemay which would make perfect sense because he probably hated kennedy the most of anyone on the joint chiefs of staff i'm going to do some more research and see if we can confirm that because i've only seen that from one spot well lemay was most likely there it's not been established he he was off doing something in canada or something fishing or whatever and and then so he gets noticed that of the assassination so he comes and he doesn't say that he was at the autopsy but there were people saying there was a our uh air force or army general there air force general with with a big cigar in the front row and that they had all the ear earmarks of lemay and you almost got the feeling that lemay was there gloating uh that hey we won we beat you you didn't beat us yeah hey here's another question

[01:20:01 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=4801s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=4801s)

yeah hey here's another question uh one another question is what about the destroying of the first notes of the autopsy oh yeah uh strange stuff i mean here is the president's autopsy so you would think they're going to keep records of everything well but they're they're building things on the fly here when they're drawing up their autopsy report and this was commander humes that was drawing up the autopsy report he had his

notes and he ends up destroying all his notes and destroying the first copy of the autopsy report because you see they they had to figure out how to make these bullets work and so the the the report is evolving um so they when they later ask humes why did you destroy your notes and he says well because they had blood on them and i knew that this was going to be really morbid and they would go down in history with these blood on them and i didn't want to embarrass the kennedys and they said well here are some other documents that have the blood on them the autopsy reporter whatever they were other stuff there that they didn't destroy why didn't you destroy that well humans didn't have a good explanation for that he says well i don't know uh but clearly they the reason they were destroying them was because they had information there that was inconsistent you brought it up dory and your remarks about you know they the the the the original bullet from the back and it was pretty clear that kennedy there's a classic military ambush he was being hit by both the front and the back and the bullet in the back was in the right shoulder and there's an autopsy photograph of a little diagram of a human being showing the bullets in the shoulder well as your little diagram of what happened the bullet has to move up to the neck and that that's where uh that's the main pretty hard to do when it's coming down at an angle exactly and uh so and then you know it comes out in this pristine just perfectly formed bullet even though it's hit all these bones and stuff which cannot be done well uh this was the the magic bullet and uh this this is

[01:22:00 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=4920s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=4920s)

this this is uh this is what they had to work with they had to make this thing work it was like trying to pound a square peg into a round hole well i really appreciate you coming today i don't think we have any more questions uh i can visit with you next time you're in dallas let me know i'd love to buy you dinner or something i think our last correspondence we were discussing um uh the bay of pigs and um i can't remember what a question is but i did some research and i came up the answers i was looking for so i need to share that uh with you regarding the bay of pigs on and you know when they cancel the order and what all happened exactly why kennedy got mad and why he felt like he was uh being set up by dulles and bissell and uh general uh uh charles cabell uh and and of course fired all three of them so uh anyway thanks for coming well it looks like we got no just a congratulations somebody saying great presentation so thanks again doug uh jacob and i really appreciate it and i hope to see you soon thank you all of you for attending tomorrow again we are having uh something that no one else has ever seen which is the preview of the exhibit to be done over in the county records building the old county records building which is now going to be the university of north texas law school and they're going to have this uh exhibit uh of what happened and they call it the aftermath and so we'll have a nice video and presentation from margaret lee and kate sutton johnson on that and of course jacob you're certainly welcome to attend as well thank you doug i mean dory if i could say i invite everybody to come and visit us at the future of freedom foundation fff.org we have a 30 years worth of articles from a libertarian perspective videos conferences and we have an fff daily that's free for the asking monthly journal that we've published for

[01:24:03 \(https://www.youtube.com/watch?v=QOLDjiOoau0&t=5043s\)](https://www.youtube.com/watch?v=QOLDjiOoau0&t=5043s)

monthly journal that we've published for 30 years and by and a weekly internet show that i do with a colleague that teaches economics at the citadel so invite everybody come see us yeah absolutely and i've read some of jacob's books highly recommend them again so uh if if you didn't get that down or something email me and i'll tell you uh uh um you know about them or hook you up with jacob or get you on amazon or whatever to order those books sounds good thank you good have a good day bye bye everyone see you tomorrow

END
